Lead Activity | Analytical Overview

Reporting window: 13 Oct 2026 | All sources | Asia/Kolkata

NEW LEADS	WELCOME CALLS	FOLLOW-UPS	MEETINGS
2	0	0	2
Created on date	Completed KPI	Completed KPI	Reported; 0 done

Executive readout

Small sample: all observations represent just two leads.

Both leads originated from Meta Ads and are classified Warm. Their mean priority score is 48/100. The source reports two meeting records, but no completed meetings or completed call activities.

Lead stage signals

Source stage counts are shown as independent signals, not a sequential conversion rate.

New leads	2	Qualified	2
Assigned	0	Proposal sent	0
Contacted	0	Converted	0
Interested	0	Lost	0

Lead priority scoring

Score range: 46 to 50 / 100 | Hot: 0 | Warm: 2 | Cold: 0

Vinod Choudhary Meta Ads / Warm	**50/100**
Alok Kummar Meta Ads / Warm	**46/100**

Activity Trace | Quality Review

Event interpretation, follow-up commitments, and reporting integrity

13 OCT 2026 | Alok Kummar

12:06 PM: Welcome call marked connected. Product interest described as agro commodities/exporting; office locations noted in Delhi and Uttar Pradesh.

12:07 PM: Follow-up for meeting logged; video-call meeting details captured. Source includes a future meeting timestamp for 14 Oct 2026, 5:37 PM.

13 OCT + 22 OCT 2026 | Vinod Choudhary

13 Oct: Welcome call marked connected. Business needs: drinking-water website and waste-management operations. Follow-up was deferred.
22 Oct, 10:34 AM: Future follow-up appears twice with matching details; counted as one distinct scheduled event here.

Data quality & KPI interpretation

Issues that should be addressed before presenting any conversion or completion rates.

01

KPI vs event mismatch

Welcome-call records show connected for both leads, while the KPI says 0 completed. Completion rules need reconciliation.

02

Not a true conversion funnel

New Leads and Qualified both equal 2 while intermediate stages are 0. These stage signals cannot support step-by-step conversion percentages.

03

Duplicate activity row

Vinod Choudhary's 22 Oct follow-up appears twice in the source. Event IDs or deduplication rules are needed.

04

Date-window leakage

A 22 Oct planned follow-up appears in the 13 Oct report. Separate event-created date, due date, and actual-completion date.

RECOMMENDED ANALYTICS RULE

Use distinct lead IDs, event IDs, scheduled timestamps and completed timestamps. Keep created, scheduled and completed activity counts as separate measures.
